Project for construction of next generation broadband network on the island of Krk

# FIBRE NETWORK TO YOUR HOME

The Project and design of the leaflet was co-financed by the European Union's European Regional Development Fund.

More details are available at [razvoj.gov.hr](http://razvoj.gov.hr) | [www.strukturnifondovi.hr](http://www.strukturnifondovi.hr) | [www.safu.hr](http://www.safu.hr)

The content of this leaflet is the sole responsibility of Grad Krk, Trg bana Josipa Jelačića 2, 51500 Krk, Croatia

### What is possible with fibre network connection?

You can access internet with speeds of several hundred megabits per second (Mbps), which can be increased up to one gigabit per second (Gbps) or even above. High speed internet surfing, watching a number of TV and video channels, home working, video-conferencing - these are the most important services that will be available, with increased quality and availability in comparison with existing services.

### Who is the owner of fibre network and how will the services be provided?

As opposed to majority of telecom networks owned by private operators, fibre network in the Project will remain in public ownership of all municipalities on Krk permanently, which is the similar case for other public infrastructures (e.g., roads, water-supply). The services over the network will not be provided by the municipalities themselves, but the services will be provided by operators active in the telecom market. Users in premises will select any operator and service according to their preferences. The selected operator will then lease fibre network's capacity and connection to the premises and start to provide services to the user. By this, the network will be open to all operators under the same conditions. Users will be able to choose from a number of services offered by several operators, which will certainly result with more favourable service quality and prices.

### How is fibre network connection implemented on user premises?

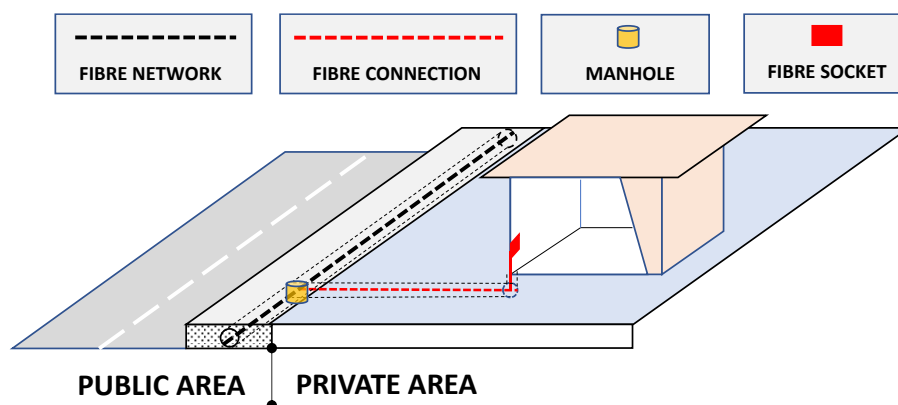

Grad Krk, in co-operation with the communal company Smart Island Krk Ltd. (SIK), will secure the visitation of the user's location in order to check existing communication installations on the user's facilities and arrange the technical realisation of the connection for all the users who have agreed on the implementation of fibre network connection.

Underground cable connections will be implemented. SIK workers will install the fibre inside a smaller tube that is leading from a manhole that is situated on the border between public and private area, to the entrance to user's premises. In cases in which such smaller tube had not been positioned or is not functional, the users are to install such tube themselves, or secure the functionality of such a tube. While installing the fibre, SIK workers will install fibre sockets at the entrance to the facilities. More technical details on the Project are available at <https://optika.grad-krk.hr/> and <https://sikrk.hr/>.

As it is the case with whole fibre network, the user connections will be implemented by fibre (optical) cables. Fibre cables do not contain metal parts and do not produce electromagnetic (radio) waves.

### When will the services over the fibre network be offered by operators?

Construction of fibre network will begin during 2022. It is planned that all users will be able to take services over the fibre network till the end of 2023. The further notice on availability of the services will be given when they become available.

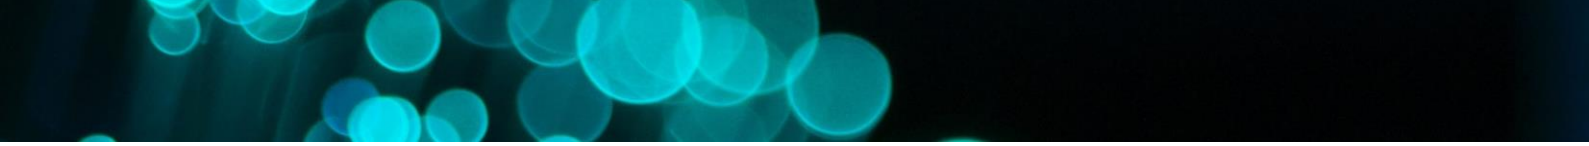

### Modern fibre network to become available on Krk!

Grad Krk, along with Baška, Dobrinj, Malinska-Dubašnica, Omišalj, Punat and Vrbnik municipalities runs the **Project for construction of fibre (optical) network connecting households, business and public facilities in so called white areas on Krk**. The project's value is 79.460.650,68 kn (10.546.240,72 EUR) and it is co-financed by EU grant of 74,48%. The project's completion is planned till the end of 2023.

If you want to install the fibre network connection to your premises, this leaflet contains instructions how to deliver your consent to install the fibre connection and to connect to the fibre network.

More details on the Project are available at: <https://optika.grad-krk.hr/>.

By giving the **consent for installation of fibre network connection** you agree that fibre network connection is installed to your premises during the implementation of the Project. Your consent has to be delivered to Grad Krk, as instructed below.

The premises' owners will undergo the check-up of existing communication installations on the premises together with the workers of SIK communal company. The SIK representatives will contact all premises' owners who delivered their consents to Grad Krk. As a premises owner you may specify any other person whom SIK representatives will contact.

Owners of apartments in multi-dwelling units shall also deliver their individual consents for installation of fibre network connections to their apartments. However, a representative of owners in multi-dwelling units must contact municipality office of Grad Krk at [suglasnost@grad-krk.hr](mailto:suglasnost@grad-krk.hr), to settle installation of the network within common parts of the premises.

### **How to complete the consent for installation of fibre network connection?**

The consent form is printed on the next page.

You must fill necessary data marked with 1, 2, 3 and 4 on the next page:

1. **Premises' address** (town/municipality, settlement, street and number).
2. **Premises' owner** (name and surname, address). If there is more than one owner, all owners shall be specified. For apartment in multi-dwelling units, owner(s) of apartment shall be specified. In case the owner is legal entity, its name shall be specified.
3. **Contact for check-up of existing communication installations** and settling details on the installation of fibre network connection (name and surname, email address, phone). You can specify any other person instead of owner whom installation contractor will contact.
4. **Date and owner's signature** (for apartment in multi-dwelling units, the signature of the apartment owner).

Notice: the consent form is also available for download at <https://optika.grad-krk.hr/>.

### **How to deliver the consent for installation of fibre network connection?**

Completed consent form shall be delivered either:

by email to [suglasnost@grad-krk.hr](mailto:suglasnost@grad-krk.hr) (scanned or photographed) or  
by ordinary mail to Grad Krk, Trg bana Josipa Jelačića 2, 51500 Krk, Croatia.

Completed consent forms must be delivered **by 15 February 2023** at the latest.

For any additional information or questions regarding completion and delivery of consent forms, please contact [suglasnost@grad-krk.hr](mailto:suglasnost@grad-krk.hr).

# CONSENT FOR INSTALLATION OF FIBRE NETWORK CONNECTION

## 1. Premises address (or apartment address within multi-dwelling unit):

TOWN/MUNICIPALITY:	
SETTLEMENT:	
ADDRESS (STREET AND HOUSE NUMBER):	

## 2. Premises owner(s) (or apartment owner(s) within multi-dwelling unit):

NAME AND SURNAME:	
ADDRESS (SETTLEMENT, STREET, HOUSE NUMBER):	
NAME AND SURNAME:	
ADDRESS (SETTLEMENT, STREET, HOUSE NUMBER):	
NAME AND SURNAME:	
ADDRESS (SETTLEMENT, STREET, HOUSE NUMBER):	
NAME AND SURNAME:	
ADDRESS (SETTLEMENT, STREET, HOUSE NUMBER):	

## 3. Contact for check-up of existing communication installations and installation of fibre connection:

NAME AND SURNAME:	
E-MAIL:	
PHONE:	

### Personal data protection

Grad Krk as Data Controller, pursuant to General Data Protection Regulation (GDPR), processes necessary set of personal data of premises' owners, for the purpose of collecting consents for installation of fibre network connections in the Project for development of broadband infrastructure in Grad Krk and municipalities of Baška, Dobrinj, Malinska-Dubašnica, Omišalj, Punat and Vrbnik. The processing of personal data is performed pursuant to Article 6.1.(e) of GDPR (exercise of official authority). The personal data will be stored permanently pursuant to principles of processing of archive material. For installation of fibre network connections, Grad Krk has legitimate interest to share your personal data with installation contractors that will deploy fibre network connection to your premises.

At any moment you have rights to access, rectify and erase your personal data, right to object certain types of processing of your personal data, and right to restrict processing of your personal data. You can claim your rights for free by submitting request to GDPR officer in Grad Krk by email at [grad-krk@grad-krk.hr](mailto:grad-krk@grad-krk.hr) or by ordinary mail to Grad Krk, Trg bana Josipa Jelačića 2, 51500 Krk. Upon receiving the request, Grad Krk can verify sender's identity. The requests will be settled as soon as possible, at latest in one month.

As owner(s) of the premise/apartment specified above under 2, I/we consent that Grad Krk, Trg bana Josipa Jelačića 2, 51500 Krk, acting as the promoter of the Project for development of broadband infrastructure on the island of Krk, installs fibre network connection to premise/apartment specified above under 1.

## 4. Date and signature (signatures of all owners):
